

Accreditation Extension

Effective immediately, the accreditation expiration date for all FACT-accredited organizations will be extended by six months, regardless of the current expiration date. This includes all:

- Clinical hematopoietic cell transplant programs
- Immune effector cell programs
- Apheresis centers
- Laboratory facilities
- Cord blood banks

This is our current best estimate of an appropriate timeline, however, if circumstances warrant, additional extensions will be implemented. New accreditation certificates will be prepared and distributed to eliminate confusion. The official list of [accredited organizations](#) is available on the FACT website. To the extent possible, programs should continue to submit documents and complete Compliance Applications during this period when on-site inspections are not being scheduled.

FACT staff are available by phone or email to review this information, and provide other assistance as needed.
